## SOFTWARE DEVELOPER

### ABOUT ME.

After my ice hockey career ended, I took all the passion I had training to achieve an elite level in my sport and poured that energy into exploring my other interests. While attending the University of Tennessee at Knoxville, I took an introduction into computer programming class that opened my eyes to the power of programming.

Even while spending the last several years abroad in Canada where I completed a Bachelors degree in Performance Music and conducted children's choirs, I still would help friends and family with website design. I knew when I moved back home to Nashville this past year I wanted to make the career change into tech and continue my programming education.

I'm so happy to be apart of the team I have found at the Nashville Software School and excited to uses the skills I've developed in this next chapter .
